

Boolean Operators

Important For Conditional Code: Return **true** or **false**

Check for value inequality

e.g. `a != b`

Check for value AND type (in)equality

e.g. `a === b / a !== b`

`> & <`

Check for value being greater / smaller

e.g. `a > b /
a < b`

`>= & <=`

Check for value being greater or equal / smaller or equal

e.g. `a >= b /
a <= b`

`!`

Check if NOT true

e.g. `!a`
